	KBPS-10	Burndown	Issue completed	0		0
	KBPS-9	Burndown	Issue completed	0		0
	KBPS-10	Sprint ended by Nehaa Joshi				-
	KBPS-8					-
	KBPS-9					-
	Total					0

Reflection Questions:

Q1. Did your estimations reflect the actual effort?

Yes, the story point estimates were generally reasonable for the work completed during the

sprint. The tasks were completed within the simulated sprint, indicating that the estimated effort was manageable for the team.

Q2. Was your backlog well-prioritized?

Yes. The backlog was prioritized according to the importance of the core manuscript submission and reviewer access-control requirements. The higher-priority functional requirements were selected for the sprint first.

Q3. How did your simulated sprint align with your plan?

The simulated sprint aligned well with the plan. The four selected backlog items were moved through the workflow from To Do to In Progress and then completed before the sprint was ended.

Q4. What insights did the burndown chart give about your team's capacity?

The burndown chart showed that the selected sprint work was completed successfully. Since the work was completed during the simulated sprint, it indicates that the team was able to handle the planned workload within the sprint timeframe.
